

Compare and Contrast Paper

In correlation with the group compare and contrast assignment that you will be doing, you will use the material that the group compiled and create a paper based on one of the following statements:

- A. Culture A is superior to Culture B
- B. Culture B is superior to Culture A

C. If Culture A was placed in the geographic region of Culture B, Culture A would succeed

D. If Culture A was placed in the geographic region of Culture B, Culture A would fail

E. If Culture B was placed in the geographic region of Culture A, Culture B would succeed

F. If Culture B was placed in the geographic region of Culture A, Culture B would fail

G. If Culture A or Culture B was placed in one of the following regions, Culture A or Culture B or either succeed or fail

The other regions are:

- | | |
|---------------------|------------------------------|
| Amazon Basin | Sahara Desert/Western Africa |
| African Rain Forest | Southern Africa |
| Malaysia | Australia |

For this compare and contrast, you may pick from the group of comparisons. Within your group, no one can submit the same paper. No other group in class may do the same two cultures

Combinations:

- | | | | |
|------------|-------------|----------|-------------|
| Greece vs. | Egypt | Rome vs. | Egypt |
| | Mesopotamia | | Mesopotamia |
| | China | | China |
| | Inca | | Inca |
| | Aztecs | | Aztecs |
| Aztecs vs. | Egypt | Inca vs. | Egypt |
| | Mesopotamia | | Mesopotamia |
| | China | | China |

Egypt vs. Mesopotamia
China

Meso vs. China

The paper must be typed, double spaced, and any additional information not found in your compare and contrast must be properly cited.

The opening paragraph must contain the statement you are going to argue. Also the opening paragraph must identify the areas of comparison.

The following paragraphs must first state the strengths of weaknesses of the cultures

Once this material is presented, you may write to support you opening statement

In regards to different timeframes, you must stay consistent. For example if you are comparing the Golden Age of Greece (600-300 BC) to the Golden Age of the Aztecs (1200-1500 AD), you must either place both cultures in 600-300 BC or 1200-1500. This means that these cultures must face the same dilemmas and neighbors as the other.

If you decide to use 600-300 BC, this means you must assume the Aztecs would never have been destroyed by the Spanish and your examination would be how they would have fared in the ancient Mediterranean

If you decide to use 1200-1500 AD, you must assume if the Greeks would have been able to withstand the invading Spanish.
